G. Douglas Ripley
3795 Chapel Hill Road
Decatur, Alabama 35603

Dear Mr. Ripley:

Dillon's Geronimo Warrior was brought in to Rising Star Ranch for semen collection and evaluation on June 14, 2007. He was found to be above average in semen quality. The specifics of his collection were:

Volume: 55 ml gel-free semen

Sperm Count: 265 million cells per ml

Progressive Motility: 70%

He responded to cooling and storage above average in Next Generator extender with Amicasin +K-Penn antibiotics. Motility at 12 hours was 55%, 24 hours was 40%, and some motility was still observed at 48 hours.

Mike Hicks
Stallion Manager
